FIBER

Foods containing fiber offer many health benefits such as *lowering* the risk of heart disease and *aiding* digestion; in addition to *controlling* weight and blood sugar.

SOLUBLE FIBER absorbs water after entering the body, turning it into a gel-like mush that is not well absorbed in the body. This effect helps to lower blood sugar spikes, increase satiety (i.e. feeling full longer), and prevent constipation.

INSOLUBLE FIBER does not absorb water so it's role is to improve bowel-related health problems and delay hunger cues.

BOTH come from plants and are forms of carbohydrates. Unlike other carbs, fiber cannot be broken down and absorbed by your digestive system; instead, as it moves through your body, it slows digestion and regulates bowel movements.

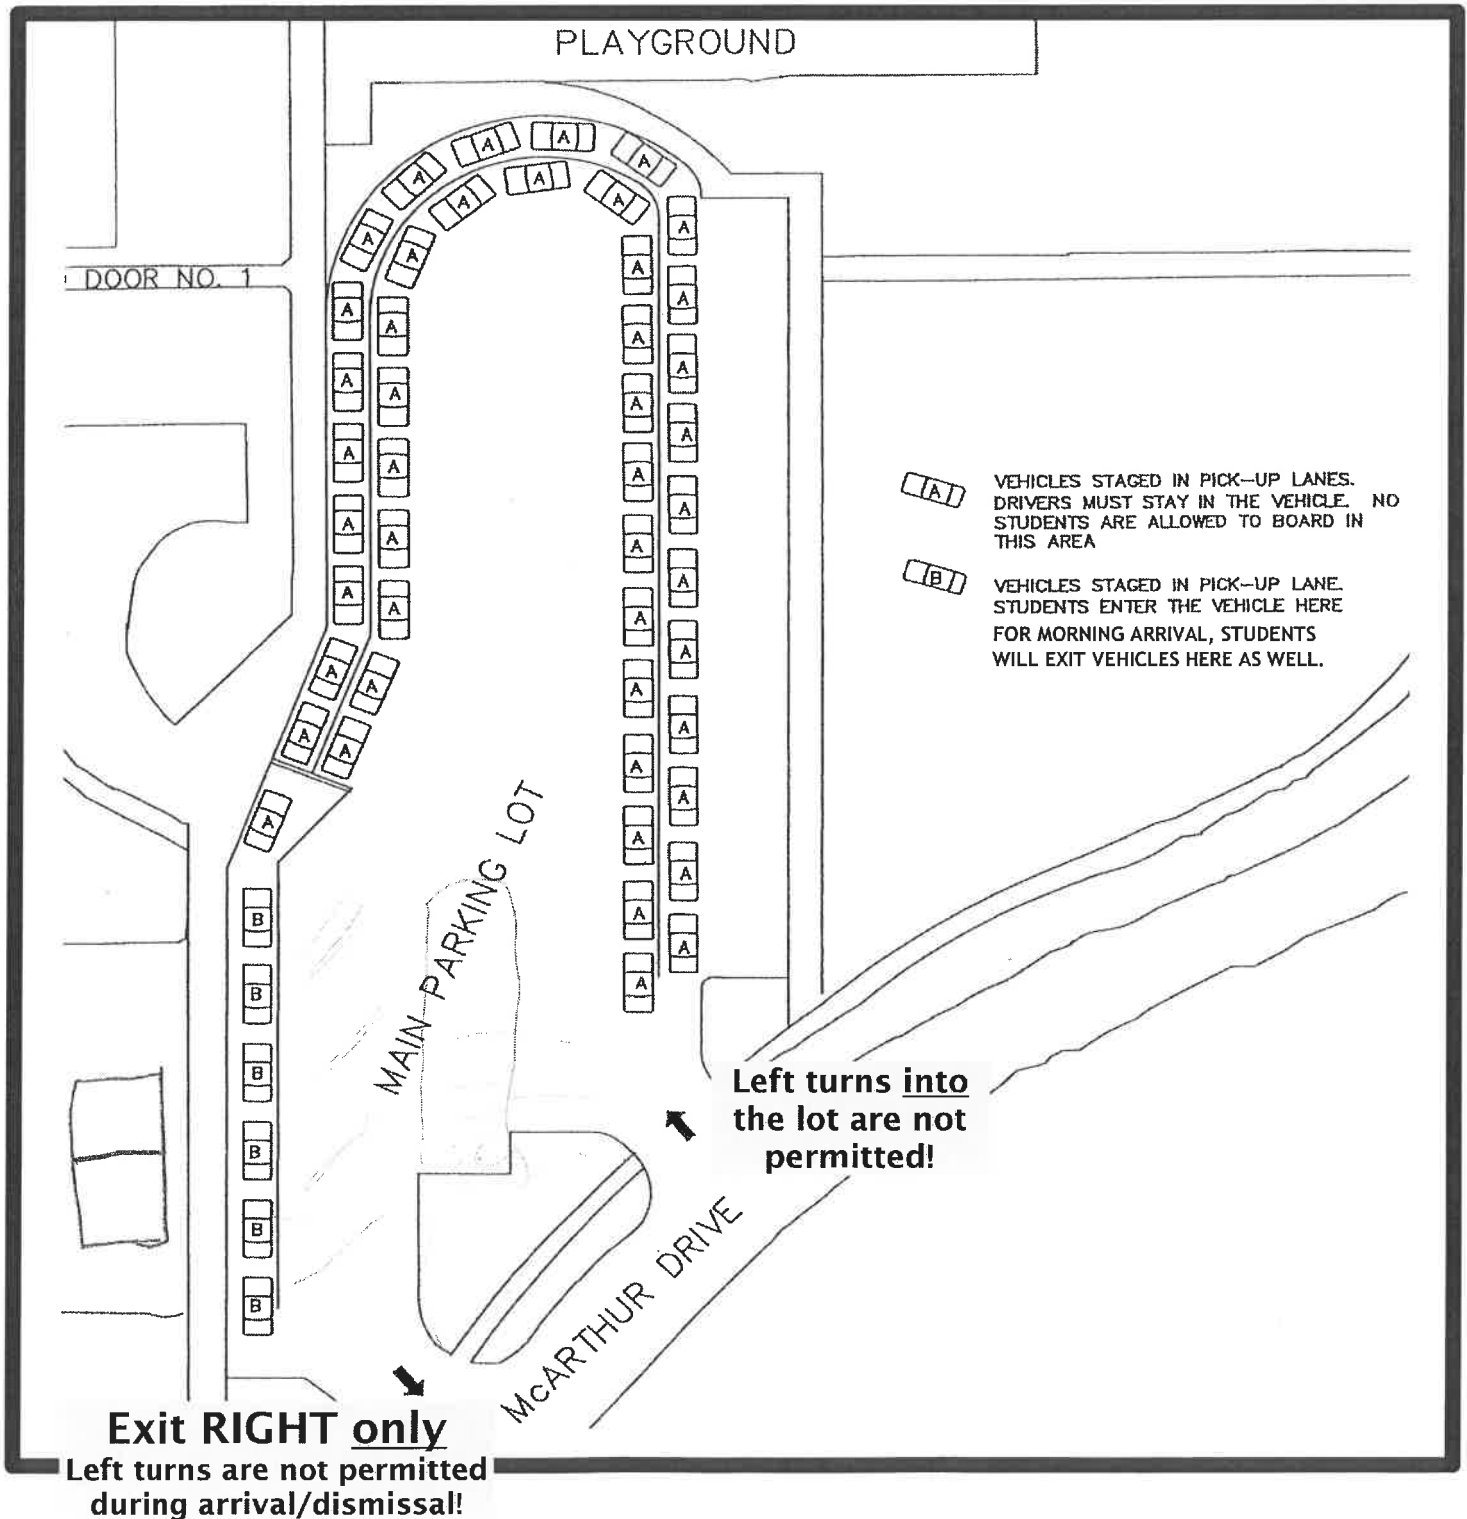

This menu is pork free.
Menus are subject to change without notice.

Arrival & Dismissal procedures for Car-riders:

Cars will enter the parking lot from McArthur Drive using two lanes in the morning and afternoon. Traffic will merge into one lane as cars approach the fence by the Portable Classrooms. For drop-off, students are to leave their car and wait in their assigned grade-level box, marked on the pavement. At dismissal time, students will be dismissed to cars once their car has stopped in the single lane along the sidewalk (see map). Cars should keep moving to the end of the line. **When entering or exiting the parking lot, please turn only RIGHT, to prevent traffic backups!**

COURTESY IS OF THE UTMOST IMPORTANCE...This is for the safety of all of our students!
